

NatAxtin® product range

Formats for supplements, cosmetics, and sports nutrition:

NatAxtin® is natural Astaxanthin from *Haematococcus pluvialis* microalgae. The pristine environment of the Atacama Desert along with the harsh sun irradiation provides ideal conditions for *H. pluvialis* to create the remarkably strong NatAxtin® Astaxanthin.

NatAxtin® contains the antioxidant power accumulated by the microalgae cells when they protect themselves from extreme solar radiation. Astaxanthin's strong antioxidant and anti-inflammatory effects are known for its wide range of health-promoting and clinical benefits when used as a nutritional food supplement

Atacama Bio Natural Products offers NatAxtin® in a variety of formats to fit your project.

NatAxtin® Oil is a versatile format that can be used for softgels, foodstuffs fortification (oil based), and is also the perfect format for cosmetic applications of Astaxanthin. In a carrier of your choice, you can develop facial and body creams, serums, lip balms, and more.

NatAxtin® Cold Water Dispersible formats (Powder CWD and Liquid CWD) are microencapsulated forms of our Astaxanthin-rich oleoresin using an in-house technology that allows them to be mixed in water. Potential applications are powder mixes for drinks, beverage fortification, and liquid formulations with Astaxanthin.

NatAxtin® PureMass ME

Microencapsulated *H. pluvialis* biomass

1.5% Astaxanthin with all the proteins, amino-acids, and vitamins from the microalgae

For hard tablets

NatAxtin® Oil

Astaxanthin-rich oleoresin by supercritical CO2 extraction

5% to 10% Astaxanthin content

For softgel capsules and formulations

NatAxtin® ME

Microencapsulated oleoresin

2.5% Astaxanthin content

For hard tablets and shake mixes

NatAxtin® Powder CWD

Cold water dispersible powder

2.5% Astaxanthin content

For powdered drink mixes

NatAxtin® Liquid CWD

Cold water dispersible liquid emulsion

1% Astaxanthin content

For drink mixes

NatAxtin® inside softgels

(through our partners)

Vegan alternative available

4mg / 8mg Astaxanthin content

With Palm Free MCT Oil (triple distilled Coconut Oil)
